Dr. Gabriel Ibarra-Mejia is an Assistant Professor at the Department of Public Health Sciences at the University of Texas at El Paso. He also holds a position as an adjunct professor for the University of Texas Health Sciences Center at Houston and collaborates as an associate consultant for the firm JFAssociates, Inc. His research interest is in the fields of environmental and occupational health and safety, concentrating on the health of Hispanic populations. Currently, he is conducting research focusing on the prevention of work-related musculoskeletal disorders caused by repetitive motion and overuse specifically on biomarkers of inflammation. He researches health and safety behaviors in Mexican-Migrant and Mexican-American construction workers and applications of GIS in environmental and occupational health. Dr. Gabriel Ibarra-Mejia has an MD and MS degree from Universidad Autonoma de Ciudad Juarez, specialized in Occupational Medicine. He also has an MS in Ergonomics degree from Luleå Tekniska Universitet in Sweden, a Ph.D. in Environmental Science and Engineering from the University of Texas at El Paso, and Post-doctoral training in Health Promotion from the University of Texas at El Paso's College of Health Sciences. Dr. Ibarra-Mejia is a member of the Human Factors and Ergonomics Society (HFES), member of the HFES's technical groups on aging, industrial ergonomics, and industrial safety and health. He is the current chair-elect for the HFES's Technical group on Safety. Additionally, he is the President-elect of the International Society for Occupational Ergonomics and Safety (ISOES). He is a full-member of the American Psychological Association (APA), the Association the Association for Psychological Science, and the American Society of Safety Professionals (ASSP).
