Ms. Shah is a Principal Consultant at Applied Safety and Ergonomics, A Rimkus Company. She has consulted and conducted research in the areas of human factors, warnings, and product and occupational safety for nearly 25 years and has extensive experience in litigation matters related to chemical hazard communication, occupational health and safety, and consumer product safety and warnings. Ms. Shah has played an active role in national standards for consumer product warnings and instructions (ANSI Z535), chemical labeling (ANSI Z129.1), and material safety data sheets (ANSI Z400.1), and she has regularly guest lectured at the University of Michigan on topics including hazard communication, driver distraction, and uncertain health and safety risks. Ms. Shah holds a master's degree in Industrial and Operations Engineering from the University of Michigan, as well as bachelor's degrees from the University of Michigan in both Psychology and Industrial and Operations Engineering. She is a Certified Product Safety Manager (C.P.S.M.) and a Certified Professional Ergonomist (CPE).
